

# SCIENCE:

**MAN-MADE, GOD SENT OR BOTH!**

- RINI VARGHESE » MUMBAI, INDIA

**In a world, where many people consider science as their 'God' or deny the existence of God, the truth is that, science is from God. Science exists because we exist and the very reason behind our existence is God!**

the symptoms of different diseases. This allows him/her to decide exactly which medication needs to be given to treat us. Every medication that we consume during our illness is carefully designed and prepared by the formulation scientists. When we buy medicine from a pharmacy store,

the pharmacist who dispenses it, is again a person of science.

God is the ultimate healer and he works through the individuals involved and through science. The Word of God in the book of Sirach (38:6-8) says, **And he gave skill to human beings that he might be glorified in his marvellous works. By them the physician heals and takes away pain; the pharmacist makes a mixture from them. God's works will never be finished; and from him health spreads over all the earth.** It is God's work that is revealed through science!

As a researcher, I experience God in my daily work. Whether in reading some literature based on my subject or while working in my research laboratory, I experience God as he unfolds new concepts and ideas to me. He is the one who guides my research! Science becomes more interesting when it is learned with God and is oriented towards him, who himself is the 'Author' of science! ◦

**L**ET'S PLAY A GAME of identifying situations where people of science are involved. Take the simple example of visiting the doctor when we are sick. They examine us and prescribe medicines which we procure from a pharmacy store and following treatment, we become well again! We know that the doctor can diagnose the disease because of his/her sound knowledge and experience in distinguishing
